RN SHETTY TRUST®
RNS INSTITUTE OF TECHNOLOGY
Autonomous Institution Affiliated to VTU, Recognized by GOK, Approved by AICTE
NAAC 'A+' Accredited & NBA Accredited
Dr. Vishnuvardhan Road, R R Nagar, Bengaluru - 560 098
Ph:(080)28611880,28611881 URL: www.rnsit.ac.in

Estd : 2001

Department of AI & DS

Semester: VIII **Section: AI&DS 'A'** **Academic year: 2025 – 26**

Weekly Internship Status Report

Name of the Student: Amit Jyala **USN: 1RN22AD004**

Name of the Internal Guide: . . . . . .

Name of the External Guide, if Any ……..

Specify type of Internship ……

((**BINT883A - Industry Internship, BINT883B – Research Internship,**
BINT883C – Skill Enhancement Course, BINT883D – Post Placement Training,
BINT883E – Online Internship)
(Attach the supporting Document)

Week No. [From-To Dates]	Summary of Discussion	Signature of Guide with Date
27 Jan 2026	Attended internship orientation session covering Artificial Intelligence, Machine Learning, Deep Learning, Neural Networks and Natural Language Processing. Understood the concept of Large Language Models (LLMs) and Generative AI. Learned the difference between Commands, Programs and Prompts. Introduction to Prompt Engineering and how prompts act as a programming language for AI. Discussed how LLMs generate outputs based on trained data and the importance of structured prompting to utilize maximum potential. Overview of upcoming CodeXpert and GEN-AI sessions and project-based learning approach.	
02 Feb 2026	Explored Model Context Protocol (MCP) and how LLMs connect to external data sources like documents, websites and databases. Understood RAG (Retrieve, Augment, Generate) process and limitations of models trained on past data. Discussed AI Agents and Agentic AI, including automation without human intervention. Learned about Zero-shot, Few-shot and Chain-of-Thought prompting techniques. Introduction to SDLC stages and how AI enhances efficiency in project development.	
09 Feb 2026	Demonstration of Internship Tracker App and LMS workflow. Learned daily task tracking, attendance logging (clock-in/clock-out) and assignment submission process. Studied the 8 major capabilities of LLMs: Content Creation, Summarization, Classification, Code Generation, Sentiment Analysis, Reasoning, Conversation and Q&A.	

		Introduction to CSV datasets and data classification concepts using AI tools. Emphasis on execution over ideas.	
	16 Feb 2026	Initiated Digital Book creation project on AI Literacy. Designed structured 13-chapter framework covering AI evolution, Machine Learning basics, LLM working, Prompt Engineering, AI tools (ChatGPT, Gemini, Claude, Notion AI, NotebookLM), AI for students and professionals, ethical AI and career roadmap. Practiced refining content using multiple LLMs. Understood concept of AI Agents as specialized AI-backed software systems.	
	23 Feb 2026	Learned Database fundamentals including Database, Table, Field, Record and DBMS concepts. Understood frontend and backend architecture using examples like IRCTC, RedBus, OYO and airline systems. Built sample database structure using Notion AI with multiple tables and records. Explored how AI tools can build applications without deep coding knowledge. Integrated learning of GEN-AI, SDLC and database concepts into practical project perspective.	
	27 Feb 2026	Consolidated learning from GEN-AI, Prompt Engineering, SDLC and Database modules. Reviewed differences between Bad, Good and Great Prompts and emphasized structured prompting using Role, Task, Constraints and Examples. Practiced image and video prompt design with cinematic parameters and outcome comparison between AI tools. Reinforced the importance of execution, efficient AI utilization and applying learned concepts in real-world projects. Focused on integrating AI tools, structured workflows and performance enhancement through effective prompt engineering.	

Remarks of Guide: Work done is satisfactory/Not Satisfactory:

(if not satisfactory, Specify the reasons**):**
